REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Regarding claims 1 and 2, none of the references of record discloses or suggests, alone or in combination, "... determining a discharge current that makes a discharge voltage detected by the detecting step equal to a discharge voltage when a new machining liquid is used, and the discharge current is determined based on relationships between a discharge voltage when the new machining liquid is used, a volume resistivity of the new machining liquid, and a discharge current of the new machining liquid..." as recited in claim 1. Regarding claims 3 and 4, none of the references of record discloses or suggests, alone or in combination, "an optimum condition computing unit, connected to the discharge voltage detecting unit and the machining condition database storing unit, for computing the discharge current, the discharge time, the non-operation time and the servo reference voltage when the discharge voltage detected by the discharge voltage detecting unit at the time of electric discharge machining coincides with the discharge voltage in the case of using the new machining liquid by the relational equations, and for sending the discharge current, the discharge time, the non-operating time and the servo reference voltage to the servo control unit" as recited in claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Entry of the replacement Abstract of the Disclosure of 3 August 2009 is approved.
